_____

Using MLR links identified in the statewide standards

MLR links identified by a technology workgroup during the standard development process appear in the hard copy version of Statewide Standards under each duty area as MLR codes.

Duty Area

A. Professional Attributes
The following MLR link to all or some of the tasks in this duty area: **CP**A01, CPA02, CPA04, CPB01, CPB03, CPC02, CPC04, CPC05, HPEC6, LAH03
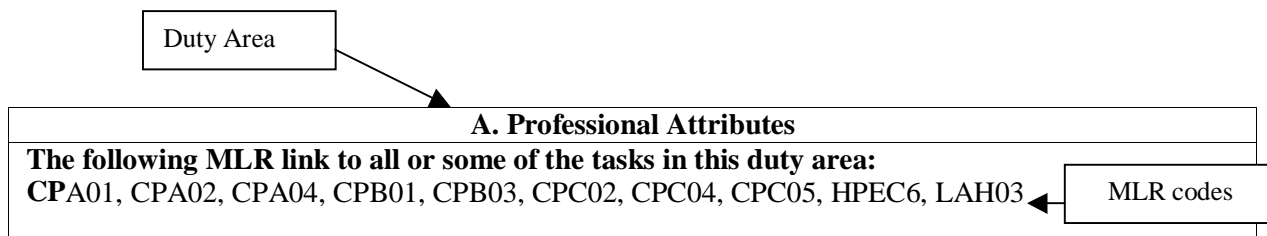

MLR codes

Example of MLR codes as they appear in a statewide standard.

These MLR codes appear in SIS to make it easy for you to identify the MLR you want to link. An explanation of the codes (eg CP for Career Prep) appear on the Section 3 – page 2.

Don't Have a Statewide Standard? The MLR links for a Duty Area haven't been identified?
Go to Section 3 – page 3 for a list of MLR frequently aligned to Technology Programs.
[When developed the "warranted list" of MLR for your program will appear in this section]

Link MLR to Duty Areas – Click Button E2

♦ Click to select Duty
♦ Click **Select New MLR to Link**
♦ Select **Content Area** from pull-down menu
♦ Select **Std** from pull-down menu of Standards associated with the Content Area selected
♦ A list of Performance Indicators for that Standard will appear
♦ Select the Performance Indicator you want as a link [black arrow will show to the left if it is selected]
♦ Click the **Add Selected Performance Indicator MLR Tasks** button
♦ You can repeat the process without closing this screen. (But unfortunately the MLR need to be selected and added one at a time rather than making multiple selections at a time)
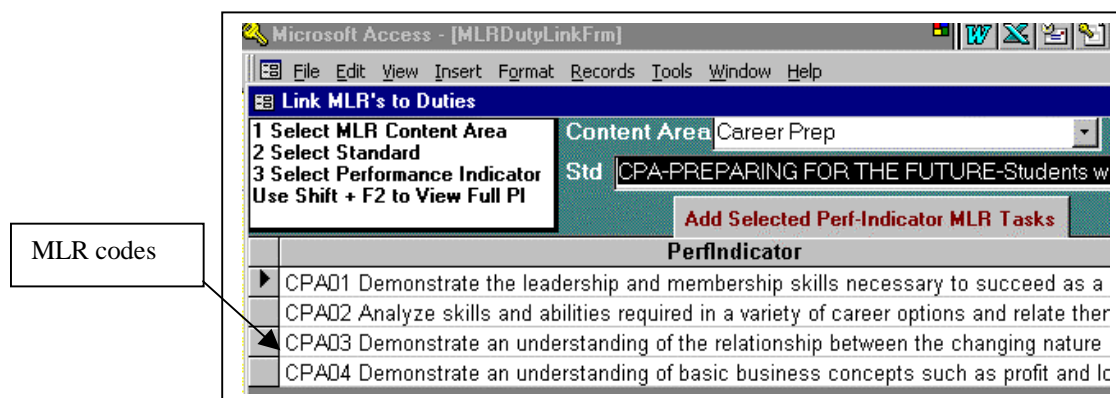

Screen at Button E2

To Make MLR Links Inactive ➜Go to Button B ➜Click the MLR Tab **➜**Find the MLR you want to inactivate ➜Check the "Make Task Inactive" Box**.**

_____

FYI - Explanation of MLR Codes used in Statewide Standards

The *MAVEA* Maine Learning Results/Curriculum Integration Project (MLR/CIP) assigned each MLR a 5-digit code in an effort to make identification of individual MLR easier. The codes appear in statewide standards to identify MLR applicable to a duty area. The same codes appear in the Student Information System (SIS) as a device to make identification of MLR links to program tasks as easy as possible.

Codes use letters to identify the MLR Content Areas and Standards.
Codes use numbers to identify Performance Indicators.

The first 2 (and sometimes 3) letters in the code indicate the Content Area:

CONTENT AREA Abbreviations		*TEXT REFERENCE
CP	Career	pages 6-9
HE	Health Education	pages 25-31
HPE	Health – Physical Education**	pages 32-37
LA	English Language Arts	pages 13-21
MA	Mathematics	pages 41-51
MCL	Modern & Classical Languages	pages 61-62
SSC	Social Studies – Civics & Government**	pages 82-85
SSH	Social Studies – History**	pages 86-88
SSG	Social Studies – Geography**	pages 89-90
SSE	Social Studies – Economics**	pages 90-94
ST	Science & Technology	pages 65-77
VA	Visual & Performing Arts	pages 97-102

**Health and its subset, Physical Education, as well as the four subsets of Social Studies—Civics and Government, History, Geography, and Economics—are identified with separate Content Area codes to avoid code duplication.

The next letter —A, B, C, etc.— indicates the Standard within the Content Area. For example,
CPA = Career Preparation, Standard A: Preparing for the Future.

Codes ending in 0 indicate Subject Standards: example - CPA00 = Career Preparation: Preparing for the Future. The text for Standard A reads, "Students will be knowledgeable about the world of work, explore career options, and relate personal skills, aptitudes, and abilities to future career decisions."
The numbers *01, 02, 03,* etc. indicate the Performance Indicators associated with the Standard in a Content Area: example - CPA01 = Career Preparation: Preparing for the Future, Performance Indicator 01— "Demonstrates the leadership and membership skills necessary to succeed as a member of a team."

Note: All references are to MLR for the Secondary Grades.
